5 Yr	N/A
Since Inception	3.83

1. Returns are net of fees, assuming reinvestment of dividends, interest and other earnings. 3-year, 5-year, and since-inception returns are annual compound total returns.

Investment Objective

The objective of the Fund is to provide absolute returns through interest income and capital gains. The Fund's risk objective is to have very low volatility and positive returns over any twelve month period.

Investment Strategy

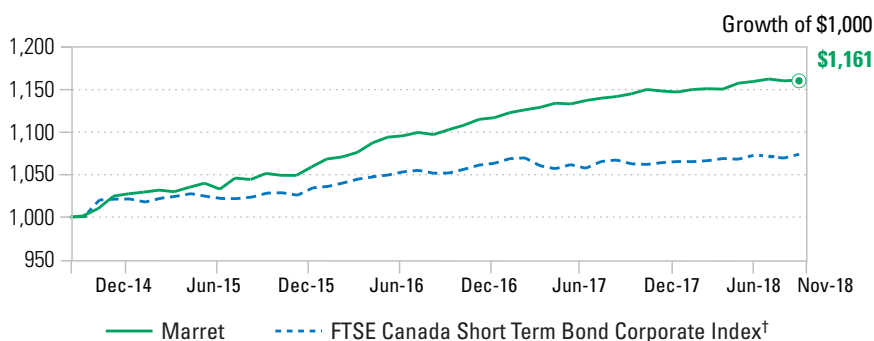

The Fund expects to invest in debt instruments across the credit spectrum including cash, government debt, investment grade corporate debt, high yield corporate debt and credit derivatives.

During periods of weak economic growth and widening credit spreads, the Fund expects the bulk of the investments to be in Government of Canada and US Treasury securities. The fund will also use government debt to hedge the interest rate risk of its corporate debt in order to isolate the credit risk of these holdings. Investment grade corporate securities will be held with the intention of creating interest income and capital gains from narrowing credit spreads. High yield corporate debt securities will be primarily higher quality, very liquid, shorter in duration, and domiciled in the US or Canada, with the intention of creating interest income and capital gains from narrowing credit spreads. One source of narrowing credit spreads may be discounts on new issues. The Fund may also use credit derivatives to hedge credit risk from corporate debt securities in a timely and efficient manner.

Why Invest

- Experienced Portfolio management team, co-led by Barry Allan and Paul Sandhu, with over 90 years combined experience.
- Risk adjusted returns generated by active portfolio management.
- Highly liquid and diversified portfolio.
- Ability to hedge, including interest rate risk using actively traded credit indices.

[†]The FTSE Canada Short Term Corporate Bond Index tracks performance of the corporate bonds denominated in Canadian Dollars with maturities of 5 years and under. Provided that the fund's mandate enables flexibility on geographies, strategies, and securities, we selected this index as the most representative amongst those available. Investment grade corporate debt securities in the Fund may be domiciled in Canada, U.S. or Europe (currency hedged from outside of Canada and U.S.), which differs from the index that comprises securities issued in the Canadian market.

IMPORTANT DISCLOSURES. This information has been prepared by Marret Asset Management Inc. (MAMI), is confidential and may not be redistributed. It is for general information purposes only and information is provided in Canadian dollars. It is not intended to provide personal investment advice or solicit sales to the fund. Investors should consult their own professional advisor for specific investment advice tailored to their needs and based on the latest available information.

The portfolio performance provided is for illustrative purposes only and is intended to show the growth of a \$1,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management and performance fees and other expenses, were deducted.

The offering of units of the Fund is made pursuant to its Offering Memorandum only to those investors who meet certain eligibility and minimum purchase requirements. Management and performance fees and expenses, including commissions and trailing commissions all may be associated with investment funds. Eligible investors should read the Fund's Offering Memorandum before investing. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated. The annual compound total returns are presented in Canadian dollars, net of transaction costs, assuming the reinvestment of dividends, interest, and other earnings. The fees and expenses are higher for Class A than for Class F. The management fee and administration fee associated with Class A is 1.00% and 0.05% (approximately based on 2017 fees) respectively, whereas the management fee and administration fee associated with Class F is 0.60% and 0.05% (approximately based on 2017 fees) respectively.

¹The FTSE Canada Short Term Corporate Bond Index tracks performance of the corporate bonds denominated in Canadian Dollars with maturities of 5 years and under. Provided that the fund's mandate enables flexibility on geographies, strategies, and securities, we selected

this index as the most representative amongst those available. Investment grade corporate debt securities in the Fund may be domiciled in Canada, U.S. or Europe (currency hedged from outside of Canada and U.S.), which differs from the index that comprises securities issued in the Canadian market.

The comparison presented is intended to illustrate the Fund's historical performance as compared with the historical performance of the FTSE Canada Short Term Corporate Bond Index. There are various important differences that may exist between the Fund and the stated index that may affect the performance of each. The objectives and strategies of the Fund result in holdings that do not necessarily reflect the constituents of and their weights within the comparable indices. Indices are unmanaged, and their returns do not include any sales charges or fees. It is not possible to invest directly in market indices.
