5 Yr	4.42
Since Inception	4.65

1. Returns are net of fees, assuming reinvestment of dividends, interest and other earnings. 3-year, 5-year, and since-inception returns are annual compound total returns.

## Investment Objective

The Fund's investment objective is to seek yield and capital appreciation by predominantly investing long and short in a broad range of public and private corporate debt securities.

## Investment Strategy

In order to meet its investment objective, the Fund will invest predominantly in investment grade corporate debt, with an average Credit Rating of BBB- and above. From time to time the Fund may invest in corporate debt rated below BBB-.

## Why Invest

- Experienced Portfolio management team, led by Paul Sandhu, with over 90 years combined experience.
- Risk adjusted returns generated by active portfolio management.
- Highly liquid and diversified portfolio.
- Ability to hedge, including interest rate risk using actively traded credit indices.

<sup>1</sup>The strategy aims to generate better risk-adjusted returns over the cycle compared to long only mandates, making the FTSE Canada All Corporate Bond Index a suitable Canadian hedge fund index to compare against. There is no Canadian hedge fund index for a global long and short leveraged fund and most corporate fixed income assets in Canada are managed relative to this index. Provided that the fund's mandate enables flexibility on geographies, strategies, and securities, we selected this index as the most representative amongst those available. The Fund invests in long and short bonds while employing currency hedging and a leverage strategy, whereas the index is a long only corporate bond index.

**IMPORTANT DISCLOSURES.** This information has been prepared by Marret Asset Management Inc. (MAMI), is confidential and may not be redistributed. It is for general information purposes only and information is provided in Canadian dollars. It is not intended to provide personal investment advice or solicit sales to the fund. Investors should consult their own professional advisor for specific investment advice tailored to their needs and based on the latest available information.

The portfolio performance provided is for illustrative purposes only and is intended to show the growth of a \$1,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management and performance fees and other expenses, were deducted.

The offering of units of the Fund is made pursuant to its Offering Memorandum only to those investors who meet certain eligibility and minimum purchase requirements. Management and performance fees and expenses, including commissions and trailing commissions all may be associated with investment funds. Eligible investors should read the Fund's Offering Memorandum before investing. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated. The annual compound total returns are presented in Canadian dollars, net of transaction costs, assuming the reinvestment of dividends, interest, and other earnings. The fees and expenses are higher for Class A than for Class F. The management fee and administration fee associated with Class A is 1.50% and 0.08% (approximately based on 2017 fees) respectively, whereas the management fee and administration fee associated with Class F is 1.00% and 0.08% (approximately based on 2017 fees) respectively.

<sup>1</sup>The strategy aims to generate better risk-adjusted returns over the cycle compared to long only mandates, making the FTSE Canada All Corporate Bond Index a suitable Canadian hedge fund index to compare against. There is no Canadian hedge fund index for a global long and short leveraged fund and most corporate fixed income assets in Canada are managed

relative to this index. Provided that the fund's mandate enables flexibility on geographies, strategies, and securities, we selected this index as the most representative amongst those available. The Fund invests in long and short bonds while employing currency hedging and a leverage strategy, whereas the index is a long only corporate bond index.

The comparison presented is intended to illustrate the Fund's historical performance as compared with the historical performance of the FTSE Canada All Corporate Bond Index. There are various important differences that may exist between the Fund and the stated index that may affect the performance of each. The objectives and strategies of the Fund result in holdings that do not necessarily reflect the constituents of and their weights within the comparable indices. Indices are unmanaged, and their returns do not include any sales charges or fees. It is not possible to invest directly in market indices.
