Investment Objective

The Fund's investment objective is to seek yield and capital appreciation by predominantly investing long and short in a broad range of public and private corporate debt securities.

Investment Strategy

In order to meet its investment objective, the Fund will invest predominantly in investment grade corporate debt, with an average Credit Rating of BBB- and above. From time to time the Fund may invest in corporate debt rated below BBB-.

Why Invest

- Experienced Portfolio management team, led by Paul Sandhu, with over 60 years combined experience.
- Risk adjusted returns generated by active portfolio management.
- Highly liquid and diversified portfolio.
- Ability to hedge, including interest rate risk using actively traded credit indices.

IMPORTANT DISCLAIMERS. This information has been prepared by Marret Asset Management Inc. (MAMI), is confidential and may not be redistributed. It is for general information purposes only and information is provided in Canadian dollars. It is not intended to provide personal investment advice or solicit sales to the fund. Investors should consult their own professional advisor for specific investment advice tailored to their needs and based on the latest available information.

The portfolio performance provided is for illustrative purposes only and is intended to show the growth of a \$1,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management and performance fees and other expenses, were deducted.

The annual Canadian Hedge Fund Awards are a quantitative measure, based solely on performance data to June 30th, provided to, and tabulated by, Fundata Canada. The annual Canadian Hedge Fund Awards program has a two-fold objective: first, to celebrate the talent and accomplishments in Canada's hedge fund industry and second, to raise awareness of that expertise in the media and among the wider investment community.

The offering of units of the Fund is made pursuant to its Offering Memorandum only to those investors who meet certain eligibility and minimum purchase requirements. Management and performance fees and expenses, including commissions and trailing commissions all may be associated with investment funds. Eligible investors should read the Fund's Offering Memorandum before investing. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated. The annual compound total returns are presented in Canadian dollars, net of transaction costs, assuming the reinvestment of dividends, interest, and other earnings. The fees and expenses are higher for Series A than for Series F. The management fee and administration fee associated with Series A is 1.50% and 0.22% (approximately based on 2020 fees) respectively, whereas the management fee and administration fee associated with Series F is 1.00% and 0.22% (approximately based on 2020 fees) respectively.

[†] The strategy aims to generate better risk-adjusted returns over the cycle compared to long only mandates, making the FTSE Canada All Corporate Bond Index a suitable Canadian hedge fund index to compare against. There is no Canadian hedge fund index for a global long and short leveraged fund and most corporate fixed income assets in Canada are managed relative to this index. Provided that the fund's mandate enables flexibility on geographies, strategies, and securities, we selected this index as the most representative amongst those available. The Fund invests in long and short bonds while employing currency hedging and a leverage strategy, whereas the index is a long only corporate bond index.

The comparison presented is intended to illustrate the Fund's historical performance as compared with the historical performance of the FTSE Canada All Corporate Bond Index. There are various important differences that may exist between the Fund and the stated index that may affect the performance of each. The objectives and strategies of the Fund result in holdings that do not necessarily reflect the constituents of and their weights within the comparable indices. Indices are unmanaged, and their returns do not include any sales charges or fees. It is not possible to invest directly in market indices.

Certain statements contained in this communication are based in whole or in part on information provided by third parties and MAMI has taken reasonable steps to ensure their accuracy. Market conditions may change which may impact the information contained in this document.

The contents of this piece are intended for informational purposes only and not to be used or construed as an endorsement or recommendation of any entity or security discussed. These investments may not be suitable to the circumstances of an investor. Some conditions apply.
